Pape Aldiouma SARR

Third-Year Cybersecurity Student (Bachelor's) – ISM Dakar | Defensive Security (SOC, DFIR) & Pentesting

(+221) 76 402 81 16 · psarr0655@gmail.com · Camberène, Dakar · github.com/dadsarr8-cyber/PORTFOLIO

PERSONAL DETAILS

Last name: SARR · **First name:** Pape Aldiouma · **Born:** December 4, 2004, in Camberène · **Marital status:** Single, no children
Address: Camberène, Dakar

PROFILE

Third-year cybersecurity student at ISM Dakar, I complement my studies with intensive hands-on practice in virtualized labs and on TryHackMe: network security, system hardening, SOC/SIEM detection and incident response. I am looking for an internship or an entry-level position in cybersecurity to put these skills to work for an organization.

CERTIFICATIONS

Jr Penetration Tester, Web Fundamentals, Pre-Security – TryHackMe 2025
Ethical Hacking & Cybersecurity – HackerX 2026
Hack With Kali Linux 2025

EDUCATION

Bachelor's in Cybersecurity, Year 3 – ISM Dakar 2026 – 2027 (ongoing)
Bachelor's in Multimedia, Internet and Communication, Year 2 – ENO Pikine 2026 – 2027 (ongoing)

TECHNICAL SKILLS

- **Network and infrastructure security:** firewalls (OPNsense / pfSense), LAN/WAN/DMZ segmentation, IPsec VPN, NAT, packet filtering
- **System security:** Linux (Debian, Ubuntu) and Windows hardening, GPO, PAM/sudo, password policies
- **Container security:** Docker, isolation (namespaces, cgroups, seccomp), AppArmor, image scanning (Trivy), runtime detection (Falco)
- **SOC / SIEM and detection:** Elastic Stack (Kibana, ECS, KQL, EQL), detection engineering (Sigma), RBAC, dashboards, detection-as-code
- **Threat Intelligence and Threat Hunting:** MITRE ATT&CK, YARA, MISP, threat hunting
- **Digital forensics (DFIR):** Volatility 3, Plaso, Auditd, chain of custody, NIST SP 800-61 methodology
- **Malware analysis:** static and dynamic analysis, isolated environment (INetSim), YARA rules
- **Ethical hacking and penetration testing:** Kali Linux (Nmap, Hydra, Nikto), lab-based testing
- **Virtualization:** QEMU/KVM, libvirt, virt-manager
- **Scripting:** Bash, PowerShell (basics)

PROJECTS AND LABS (QEMU/KVM virtualized environment, 2025 – 2026)

- **Advanced filtering and NAT (OPNsense):** deny-all rules and aliases, hybrid Outbound NAT, Port Forward, testing from Kali.
- **Suricata IDS on OPNsense:** ET Open/Abuse.ch rules, Nmap, Hydra, Nikto and SQLi attacks, EVE JSON analysis.
- **Firewall, DMZ and remote-access IPsec VPN:** LAN/WAN/DMZ segmentation, Docker app published via Nginx reverse proxy.
- **Linux administration and SSH:** role-based groups, ACLs on sensitive directories, hardened ed25519 key-based SSH.
- **Linux hardening (Ubuntu):** Lynis, UFW/iptables, Fail2Ban, Auditd, PAM, sysctl, before/after Nmap scans.
- **Protection against system attacks:** ClamAV + Cron, closing unused ports, SUID/sudo/cron privilege escalation fixes.
- **Windows 11 / Server 2019 hardening:** PowerShell, SMBv1/LLMNR disabled, GPO, Defender, Sysmon, UAC.
- **Container isolation:** seccomp, AppArmor, Trivy, Falco, simulating then blocking a container escape.
- **Detection and threat hunting:** MITRE ATT&CK, Sigma and YARA rules, threat hunting, IOCs in MISP.
- **Malware analysis:** isolated INetSim lab, static and dynamic analysis, IOC/ATT&CK/YARA report.
- **Forensics and incident response (DFIR):** NIST SP 800-61, Volatility 3, Plaso super-timeline.
- **Cloud SIEM:** deployment of an Elastic Cloud Hosted cluster, cost and endpoint management.
- **Data ingestion and search:** ECS template, Data View, KQL queries, restricted API key.
- **Detection Engineering & Dashboards:** RBAC, rule tuning, custom EQL rules, detection-as-code.
- **SOC L1 incident investigation:** 5W triage, EQL correlation, Kibana Timeline, Elastic Case and incident report.

SELF-DIRECTED LEARNING

- **Ethical Hacking – Udemy (2026):** reconnaissance, vulnerability scanning, exploitation and post-exploitation in a lab.
- **TryHackMe (2025 – 2026):** Pre-Security, Web Fundamentals and Jr Penetration Tester paths, hands-on rooms and CTFs.
- **Home lab:** QEMU/KVM environment (OPNsense, Debian, Ubuntu, Windows, Kali) to reproduce attacks and defenses, projects documented on GitHub.

EXPERIENCE

Multiservice Shop Manager – Pikine Technologie (PIKTECH), seasonal (July–October) 2023 – 2025
First-level IT support, troubleshooting, customer service, cash register and equipment management.

SOFT SKILLS

Curious and self-taught · Rigorous and organized · Team player · Resilient under pressure
